Dear Yoav Nir

Thank you for your reply.

Based on the information provided, you will be carrying two argon cartridges, each containing 21 ml of gas.

According to the applicable regulations:

- The gas must be classified as Division 2.2 with no subsidiary hazards, which applies to argon.
- The water capacity of each cartridge must not exceed 50 ml.
We understand that the 21 ml indicated refers to the capacity of each cartridge.

Our back-office team has reviewed your request and approved the transport of the two argon cartridges as requested.

The cartridges may be carried in either your carry-on baggage or checked baggage, provided that the Coravin system is protected against accidental activation.

Please let us know if you have any further questions.

Best regards,
Icelandair

Hi,

It is a Coravin system.

<https://www.coravin.com/>

<https://www.coravin.com/collections/all/products/argon-capsules>

I'm planning to take two capsules.

it's to use with the Coravin system to serve wine by the glass on our upcoming cruise.

You can call me at: +32476676706

Thank you.

Yoav
